

Morris Close, Shrub Lane Burwash

July 2016

R G Carter Southern were employed to complete outstanding works for Hastoe in September last year, following the demise of the original contractor. In doing so we found there were a number of apparently minor issues that needed to be corrected.

Unfortunately this led to the uncovering of a series of more major issues. In light of this information a decision has been made to take down and rebuild block A, the six houses and to maintain and repair block B, the four flats.

These works will commence in July and residents will be moving in summer 2017. We shall keep local residents informed of our progress with regular newsletters.

Block A will be dismantled stages, initially we will carefully remove windows and doors for reuse and also the Eco bead insulation has to be extracted before any structure can be removed to contain the beads and limit any escape.

The working hours for this project will be 8.30am - 5.30pm Monday to Friday, and in total dismantling will take six weeks to complete. The above process will take four weeks with the structure and foundations taking a further two.

Due to the building being lightweight there will be little change in noise levels. There will however be dust which will be controlled by water jets to dampen it down in order to minimise the dust hazard to residents within the vicinity.

Please see a site plan and also a photo showing Block A to give a better indication of which block will be dismantled.

Any concerns or queries please contact our Project Manager John Turkentine on 07917 855829 or shrublane@rgcarter.co.uk

R G Carter is an Associate member of the Considerate Constructors scheme, of which this site is registered. This is a voluntary scheme we subscribe to be assessed on how considerate we are to our neighbours, promoting best practice throughout the construction industry.
